5. Blood group is due to the presence or absence of surface
   a. Antigens on the surface of WBC
   b. Antibodies on the surface of RBC
   c. Antigens on the surface of RBC
   d. Antibodies on the surface of WBC
6. A person having both antigen A and antigen B on the surface of RBCs belongs to blood group
   a. A b. B **c. AB** d. O
7. Erythroblastosis foetalis is due to the destruction of
   a. Foetal RBCs
   b. Foetus suffers from atherosclerosis
   c. Foetal WBCs
   d. Foetus suffers from mianmata
8. Dub sound of heart is caused by
   a. Closure of atrio-ventricular valves
   b. Opening of semi-lunar valves
   c. Closure of semi-lunar values
   d. Opening of atrio-ventricular valves.
9. Why is the velocity of blood flow the lowest in the capillaries?
   a. The systemic capillaries are supplied by the left ventricle, which has a lower cardiac output than the right ventricle.
   b. Capillaries are far from the heart, and blood flow slows as distance from the heart increases.
   c. The total surface area of the capillaries is larger than the total surface area of the arterioles.
   d. The capillary walls are not thin enough to allow oxygen to exchange with the cells.
10. An unconscious patient is rushed into the emergency room and needs a fast blood transfusion. Because there is no time to check her medical history or determine her blood type, which type of blood should you as her doctor, give her?
    a. A^- b. AB **c. O^+** d. O^-
11. Which of these functions can be carried out by a matured red blood cell?
    a. Protein synthesis
    b. Cell division
    c. Lipid synthesis
    d. Active transport
12. At the venous end of the capillary bed, the osmotic pressure is
    a. Greater than the hydrostatic pressure
    b. Result in net outflow of fluids
    c. Results in net absorption of fluids
    d. No change occurs
13. A patient's chart reveals that he has a cardiac output of 7500mL per minute and a stroke volume of 50 mL. What is his pulse rate (in beats / min)
    a. 50 b. 100 **c. 150** d. 400
14. At any given time there is more blood in the venous system than that of the arterial system. Which of the following features of the veins allows this?
    a. relative lack of smooth muscles
    b. presence of valves
    c. proximity of the veins to lymphatic's
    d. thin endothelial lining
15. Distinguish between arteries and veins.
16. Distinguish between open and closed circulation.
