5. Identify the wrong match

a. Bowman's capsule	- Glomerular filteration
b. DCT	- Absorption of glucose
c. Henle's loop	- Concentration of urine
d. PCT	**- Absorption of Na^+ and K^+ ions**

6. Podocytes are the cells present on the
   a. Outer wall of Bowman's capsule
   b. Inner wall of Bowman's capsule
   c. Neck of nephron
   d. Wall glomerular capillaries
7. Glomerular filtrate contains
   a. Blood without blood cells and proteins
   b. Plasma without sugar
   c. Blood with proteins but without cells
   d. Blood without urea
8. Kidney stones are produced due to deposition of uric acid and
   a. silicates
   b. minerals
   c. calcium carbonate
   d. calcium oxalate
9. Animal requiring minimum amount of water to produce urine are
   a. ureotelic b. ammonotelic
   b. uricotelic d. chemotelic
10. Aldosterone acts at the distal convoluted tubule and collecting duct resulting in the absorption of water through
    a. Aquaphorins b. spectrins
    c. GLUT d. Chloride channels
11. The hormone which helps in the reabsorption of water in kidney tubules is
    a. cholecystokinin
    b. angiotensin II
    c. antidiuretic hormone
    d. pancreozymin
12. Malpighian tubules remove excretory products from
    a. mouth b. oesophagus
    c. haemolymph d. alimentary canal.
13. Arrange the following structures in the order that a drop of water entering the nephron would encounter them.
    e. Afferent arteriole
    f. Bowman's capsule
    g. Collecting duct
    h. Distal tubule
    i. Glomerulus
    j. Loop of Henle
    k. Proximal tubule
    l. Renal pelvis
14. Name the three filtration barriers that solutes must come across as they move from plasma to the lumen of Bowman's capsule. What components of the blood are usually excluded by these layers?
15. What forces promote glomerular filtration? What forces opposes them? What is meant by net filtration pressure?
16. Identify the following structures and explain their significance in renal physiology?
    a. Juxtaglomerular apparatus
    b. Podocytes
    c. Sphincters in the bladder
17. In which segment of the nephron most of the re-absorption of substances takes place?

XI Std Zoology Chapter-8 EM.indd 151 30/12/2022 13:48:08
