Placentation

The mode of distribution of placenta inside the ovary

Marginal
It is with the placentae along the margin of a unicarpellate ovary.
Example:Fabaceae.

Axile
The placentae arises from the column in a compound ovary with septa.
Example:
Hibiscus,tomato
lemon

Superficial
Ovules arise from the surface of the septa.
Example:
Nymphaeaceae

Parietal
It is the placentae on the ovary walls or upon intruding partitions of a unilocular, compound Ovary.
Example:
Mustard, *Argemone*, cucumber.

Free-central
It is with the placentae along the column in a compound ovary without septa.
Example:
Caryophyllaceae,
Dianthus, Primrose

Basal
It is the placenta at the base of the ovary.
Example: Sunflower (asteraceae) Marigold

4.6 Construction of floral diagram and floral formula

A floral formula is a simple way to explain the salient features of a flower. The floral diagram is a representation of the cross section of the flower. It represents floral whorls arranged as viewed from above. Floral diagram shows the number and arrangement of bract, bracteoles and floral parts, fusion, overlapping and placentation.

The branch that bears the flower is called **mother axis**.
