Glossary

Acetyl CoA	Small, water-soluble metabolite comprising an acetyl group linked to coenzyme A (CoA).
Active site	Region of an enzyme molecule where the substrate binds and undergoes a catalyzed reaction.
Akinetes	Thick walled, dormant, non motile asexual spores.
Aleurone	Outer layer of the endosperm
Anamorph	Asexual or imperfect state of fungi
Anisogamy	Fusion of morphologically and physiologically dissimilar gametes
Apogamy	Formation of sporophyte from the gametophytic tissue without the fusion of gametes.
Apospory	Development of the gametophyte from the sporophyte without the formation of spores
Balausto	Fleshy in dehiscent fruit
Basal body	Structure at the base of cilia and flagella from which microtubules forming the axoneme radiate
Biosphere	The region of earth on which life exist
Buffer	A solution of the acid and base form of a compound that undergoes little change in pH when small quantities of strong acid or base are added.
Carcinogen	Any chemical or physical agent that can cause cancer when cells or organism s are exposed to it.
Chemotaxonomy	Classification based on the biochemical constituents of plants
Clades	Group of species comprising common ancestor and its descendants
Cladistics	Methodology used to classify organisms into monophyletic group
Codon	Sequence of three nucleotides in DNA or mRNA that specifies a particular amino acid during protein synthesis; also called triplet
Coenocytic condition	Aseptate, multinucleate condition
Dalton	Unit of molecular mass approximately equal to the mass of a hydrogen atom ($1.66 \times 10{-}24$ g)
Endosperm	Nutritive tissue for the embryo
Endospore	Thick walled, resting spores
Eusporangiate	Sporangium formed from a group of initials
Fossil	The remains or impression of plant or animal of the past geological age
Gametophyte	The haploid plant body
Genome	Complete set of genes in an organism
Germ	Protein rich embryo
