B. If both Assertion and Reason are true but Reason is not a correct explanation of the Assertion

C. If Assertion is true but the Reason is false.

D. If both Assertion and Reason are false.

1. **Assertion:** In woody stems the amount of heart wood continue to increase year after Year

   Reason: The activity of cambial ring continues uninterrupted

   a. A b. B

   c. C d. D

2. **Assertion:** Secondary growth in dicot roots occurs with the help of vascular cambium and phellogen.

   Reason: Vascular cambium is completely primary in origin.

   a. A b. B

   c. C d. D

Answer the Following

8. When the plants shed their leaves how do they respire?
9. What is wood botanically?
10. In a forest, if the bark of a tree is damaged by the horn of a deer, How will the plant overcome the damage?
11. Differentiate the wood formed in *Pinus* from that of *Morus*
12. In which season the vessels of angiosperms are larger in size, why?
13. Central part of the wood is always dark. Why?
14. Continuous state of dividing tissue is called meristem. In connection to this, what is the role of lateral meristem?
15. A timber merchant bought 2 logs of wood from a forest & named them A & B, The log A was 50 year old & B was 20 years old. Which log of wood will last longer for the merchant? Why?
16. A cross section of tree trunk contains 60 lighter and 60 darker rings. Determine the age of the tree and justify
17. A transverse section of the trunk of a tree shows concentric rings which are known as growth rings. How are these rings formed? What are the significance of these rings?
18. There are many tissues produced outside the vascular cambium in the stem. Explain them
19. When you go to a timber mart to collect timber for your construction of a new house, how will you select good timber?
20. Explain artificial seasoning.
