
GROWTH PROMOTERS
Auxin
Apical dominance
Prevents abscission
Weedicide
Cytokinins
Root /Shoot initiation from Callus
Delaying ageing process
Promote lateral bud growth
Gibberellins
Bolting
Synergistic effects
Auxin, GA3 and Cytokinin induces Plant growth
Plant Growth Regulators
Antagonistic effects
ABA GA3
Induces seed dormancy
Breaks seed dormancy
GROWTH INHIBITORS
Ethylene
Induce Abscission
Fruit ripening
ABA
Radial growth
Yellowing of leaf
Induce Abscission
Closure of stomata
